

T.E.S. FILER CITY STATION
FILER CITY, MICHIGAN

T.E.S. Filer City Station of Filer City, Michigan, generates 60 MW's of electricity that is sold to the Consumers Energy grid. It also produces 140 thousand pounds per hour of process stream that is sold to a paper mill. The station is a member of the State of Michigan Clean Corporate Citizen Program and the Michigan Business Pollution Prevention Partnership.

ENVIRONMENTAL PERFORMANCE

Past Accomplishments

T.E.S. Filer City has demonstrated its commitment to environmental performance in the areas of air and water pollution. Since 1998, the facility has:

- **Reduced air emissions** (mist from the oil reservoir to the outside air) from 2 to 0 gallons per year by purchasing a vapor demister unit.
- **Reduced chemical releases** by training operators to install a cover that seals storm drains when unloading chemicals.

Future Commitments

T.E.S. Filer City also committed to continued environmental improvement through reductions in NOx and discharges of sediment. By 2003, the facility will:

- **Reduce NOx** by 62% per mmbtu through designing and installing a NOx reduction system.
- **Eliminate discharge of sediment to water** by eliminating run-off from the facility's coal pile, which is next to Manistee Lake.

COMMUNITY OUTREACH

T.E.S. Filer City Station records and reports any environmentally-related complaints or concerns from the general public. Community members are informed of important matters through the newspaper. The Performance Track Annual Performance Report will be available at the Manistee County Library.

AT A GLANCE

Industry Sector:	SIC 4911
Business:	Generates electricity and process stream
Facility Employees:	Fewer than 50
Accomplishments:	Reduced air emissions Reduced chemical releases
2003 Commitments:	Reduce NOx Reduce discharges of sediment to water
Address:	700 Mee St. P.O. Box 12 Filer City, MI 49634
